

PROTOCOL FOR THE CONDUCT OF “JUMP OUTS”

This protocol is for the conduct of “jump outs” conducted by the following race clubs in South Australia.

- Morphetville
- Murray Bridge
- Strathalbyn
- Gawler
- Port Lincoln
- Mt Gambier

All “jump outs” are to be conducted in accordance with the following provisions:-

- ~ “Jump outs” are to be conducted as an extension of track work, during the hours currently in place – please note the closing time for track work has been extended from 9.00 am to 10.00 am.
- ~ The traditional practice of jumping out horses from different stables together is to be varied to the following:-
 - Where possible only horses from the same stable are to jump out together and must be loaded into the barrier gates by the Trainer’s **own staff only**, provided that in the event a Trainer has only one (1) horse to “jump out”, permission may be granted for such horse to jump out with another Trainer’s horses. In such an event, the “single” horse should be loaded in the barrier with one (1) barrier gate left vacant between its gate and the other Trainer’s horses. In addition these “combination jump outs” should be scheduled to take place at the end of the “jump out” session.
 - Once a Trainer’s horses have jumped from the gates, are cleared from the track AND the gates have been sprayed down with disinfectant by an authorised person from the relevant Club, the next Trainer may load his/her horses into the barrier gates.
 - Riders are permitted to ride in more than one “jump out” provided they comply with the current biosecurity provisions currently applicable to Trials and Race meetings.
- ~ The Club must ensure that all horses attending “jump outs” and all Riders who service the “jump outs” are recorded and the details forwarded to TRSA Limited the following business day.
- ~ **PLEASE NOTE** – It will remain the responsibility of the Club conducting “jump outs” under this protocol to ensure compliance with the current Biosecurity provisions.
